DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Oshimi et al U.S. Patent Number 6,169,794.

Re Claims 11 and 13, fig. 1 teaches plurality of SCP databases (a plurality of server) over a LAN network (a packet-based network) whereby the SCP (server/call agent) stores different type of subscriber information (master call control data); fig. 3 teaches a control terminal 54 (a maintenance terminal) coupled to the access means management unit 56 for getting access to each of the servers (See col. 4, lines 15 +), wherein the SCP stores a copy of subscriber information from the SMS to perform network wide call control.

Re Claim 12, refer to Claim 11, wherein fig. 4 teaches the different types of master control data in the implementation table that is stored in the main subscriber database of SMS.

Allowable Subject Matter

3. Claims 1-4 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claims 11-13 have been considered but are moot in view of the new ground(s) of rejection.
